OREGON WHEAT VARIETIES

July 12, 2011 PRESS RELEASE Internet-www.nass.usda.gov/or Email: nass-or@nass.usda.gov USDA, NASS, Oregon Field Office 805 SW Broadway, Suite 910 Portland, Oregon 97205 (503) 326-2131 or 1-800-338-2157

Oregon 2011 wheat varieties: ORCF 101 again #1

ORCF 101 (OSU Clearfield) accounted for 20.1 percent of the planted acreage this year, up from 18.9 percent from 2010. Last year ORCF 101 replaced Stephens as the leading variety for Oregon. Stephens had held that distinction since 1979. There were three other varieties that pushed Stephens to the number 5 spot this year at 9.5 percent, down from 12.0 percent. The second most planted variety was Tubbs 06 at 15.3 percent, up from 9.8 percent. ORCF 102 (OSU Clearfield) came in third at 11.9 percent, up from last year's 6.8 percent. Fourth was Goetze at 9.7 percent, up from 9.4 percent last year. District level estimates were made for 46 varieties and mixtures plus a grouping of all other varieties for each class of wheat.

This report is the result of a survey conducted by the Oregon Field Office of the National Agricultural Statistics Service. Funding for the survey was provided by the Oregon Wheat Commission. This report would not be possible without the cooperation of participating farmers and ranchers.

Wheat varieties: Percent of acreage by district, Oregon 2010-2011
